## WORK EXPERIENCE

### QA Engineer, Navo (Formerly Bizup)
Dec 2024 - Present · Gurgaon, India

- Spearheaded enterprise **test automation** initiative across **API, Android, and Web** platforms, reducing manual testing efforts by **60%** and increasing overall test coverage by **40%**
- Streamlined CI/CD deployment workflows through **Jenkins pipeline automation** and cloud infrastructure optimization, cutting **release cycles by 25%**
- Established comprehensive **production monitoring** and alerting systems with **multi-channel notifications** (Google Chat, Twilio), ensuring **zero downtime** incidents

### QA Engineer, Thriwe
Aug 2024 - Nov 2024 · Gurgaon, India

- Built production-ready **web automation framework** using **Python** and **Playwright** with modular architecture, **reusable components**, and comprehensive test coverage for critical user journeys (login, signup, user flows)
- Implemented **page verification scripts** with **URL/navigation validation** and UI integrity checks, reducing post-deployment defects and increasing release confidence

### QA Executive, Bizup
Sept 2023 - June 2024 · Gurgaon, India

- Aligned QA strategies with Engineering/Product teams, improving **deployment efficiency by 25%**; Ensured **zero critical bugs** in **2 flagship releases** contributing to **20% revenue growth**
- Validated **5+ cross-platform products** (Android, Web, API) through **manual/exploratory testing**, identifying critical edge cases; Led **end-to-end release cycles** with regression, smoke, and UAT coordination
- Performed **API testing** using **Postman** (REST endpoints, authentication, error handling); Managed defect lifecycle in **Jira** with detailed reproduction steps and severity tracking

## PROJECTS

### API Test Automation Suite (RestAssured & Postman/Newman)
**GitHub | Live**

- Engineered a **REST API automation framework** with **471 automated tests** across two production APIs, BOMB (212) and the Navo Buyer App (259), using **RestAssured**, **TestNG** and Maven, alongside **Postman**/Newman collections, reaching a **100% pass rate (471/471)** on the latest full run
- Implemented complete **CI/CD pipeline** with Jenkins automation, **AWS S3** timestamped reports, **Python**-based result parsing, intelligent **3-attempt retry mechanism**, and **multi-channel notifications** (email/Google Chat)

### Master QA Prompts: AI-Generated QA Documentation (Frontend & Backend)
**GitHub | Live**

- Wrote **two reusable master prompts** (backend API and web frontend) that an **AI coding agent** runs against a codebase to generate its **complete QA system**: a 9-section QA context, exhaustive test cases, smoke and environment docs, coverage checks and an HTML QA dashboard
- Enforced a **strict step order** (pre-scan, QA context, Bruno API collection, then test cases) so every Expected Result is derived from an **existing API assertion** rather than an invented response shape

### Android Automation Framework
**GitHub | Live**

- Built scalable **Android UI automation framework** using Java, **Appium 10.0.0**, and **TestNG** for Bizup Buyer App testing across **3 versions** (2.16.4, 3.0.1, 3.0.4)
- Implemented **Page Object Model** architecture with versioned test suites (Smoke/Regression), **BrowserStack** cloud integration, and centralized driver management for **parallel execution**

## EDUCATION

### Bachelor of Engineering in Computer Science
Aug 2019 – Jun 2023

Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur, Maharashtra · GPA 7.4/10

## TECHNICAL SKILLS

| | |
|---|---|
| **Automation & Testing** | Selenium, Appium, Playwright, RestAssured, TestNG, BrowserStack, Postman, Newman |
| **Languages, CI/CD & Build** | Java, Python, Bash, Node.js, Jenkins (Groovy Pipelines), AWS S3, AWS CLI, Git/GitHub, Maven, Gradle, Android SDK, APK/AAB Building, Code Signing |
| **Reporting, Integrations & Management** | Allure, ExtentReports, Log4j2, MongoDB, SQL, Google Chat Webhooks, Twilio API (WhatsApp/Voice), SMTP Email, Jira, Agile/Scrum |
